

HACKATHON SUBMISSION

Lecturify

Check your schedule without hustle.

A role-based college platform for **verified official updates**, academic administration, student directory, and digital attendance — built for students, faculty, and directors.

PROJECT TYPE

Web Application (React + TypeScript)

STATUS

Working Demo with Pre-loaded Data

REPOSITORY

Public — [avnihere-py/lecturify](#)

TEAM

Lecturify Hackathon Entry

Quick Links — Everything in One Place

Share these links with judges, mentors, and reviewers.

GITHUB REPOSITORY (SOURCE CODE)

<https://github.com/avnihere-py/lecturify>

Public repo — view code, clone, and run locally. Read-only for visitors.

DOCUMENTATION

github.com/avnihere-py/lecturify/blob/main/DOCUMENTATION.md

Full project documentation — problem, solution, credentials, features.

DEMO VIDEO (LOOM)

loom.com/share/1d6477ebb9e24c2f9e8108ede935783c

Walkthrough of Lecturify — login flows, dashboards, and key features.

PRESENTATION (PPTX)

github.com/avnihere-py/lecturify/blob/main/docs/lecturify-presentation.pptx

Slide deck explaining how Lecturify works — problem, solution, and user flows.

RUN LOCALLY

localhost:5173

After `npm install` and `npm run dev` — see Quick Start below.

The Problem

Colleges struggle with communication chaos and manual administration every day.

! **Scattered communication** — Cancellations, exams, and holidays get lost in WhatsApp groups and informal chats.

! **No single source of truth** — Students can't tell official notices from random messages.

! **Manual academic admin** — Directors and faculty lack one place for departments, rosters, and assignments.

! **Attendance friction** — Paper sheets and spreadsheets fail when Theory and Lab need separate records same day.

! **Role confusion** — Students, faculty, directors, and CRs all need different tools — but get the same generic channels.

Our Solution

Lecturify centralizes verified college communication and administration in one clean web app.

Area	What Lecturify Does
Verified Updates	Teachers and CRs post official class updates. Students see a filtered feed — cancellations, exams, schedules, holidays only.
Role-Based Access	Separate portals for Student, Faculty, and Director with tailored dashboards and permissions.
Director Admin	Academic setup, student directory with profiles, faculty ID management, campus-wide alerts.
Faculty Tools	Post updates, digital attendance, student roster, subject teachers, CR management.
Attendance Sheets	Theory / Lab sessions, draft & lock, history view, multiple sheets per day.
Demo Ready	Pre-loaded director, 2 faculty, 10 students, Robotics & AI class — explore instantly.

Demo Credentials

No setup required — sign in with these accounts to explore every role.

Role	Login ID	Password	Notes
Director	D001	director123	Full admin — academics, directory, alerts
Faculty	T001	teacher123	Dr. Meera Singh — class teacher
Faculty	T003	teacher123	Subject teacher
Student (CR)	04801242026	student480	Neha — Class Representative
Student	05801242026	student580	Priya

Student password pattern: student + digits 2–4 of enrollment no. (e.g. 04801242026 → student480)

Features by Role

Student • Official class update feed • Campus alerts • Filter by update type • Class chat • Profile management • CR posting tools (if assigned)	Faculty • Post verified updates • Digital attendance (Theory/Lab) • Lock sheets & view history • Student roster & profiles • Add subject teachers • Assign Class Representative	Director • Campus-wide alerts • Department & program setup • Student directory + filters • Expandable student profiles • Faculty ID overview • Academic structure management
